Just try to get an invention sold, and creat US JOBS
FOR US CITIZENS.

**Hello Everyone;
(expand your screen as always)**

I have always had the problem of being a dreamer, and the problem of believing AMERICANS WANTED TO HELP AMERICANS. In truth, I have always believed we are a country who wants to be a little bit above the world in moral standings and helping others. Why else would we have driven thousands of young people to join the Peace Corps in the 60's? Why else would we sing "AMERICA THE BEAUTIFUL"? Why else would we encourage everyone (when we are too young to believe it could not be something else) to love their fellow man, and America is strong because we believe in the good and kindness of our fellow AMERICANS?

Well even though I have grown older since I believed in Santa Clause, The Easter Bunny, and the Tooth Fairy (much much older actually), I guess somewhere in the back of my mind I still believed they existed and "SUPERMAN was truly the TRUTH, JUSTICE and THE AMERICAN WAY" and a reason for us to believe. THAT WAS ALL BEFORE I INVENTED SOMETHING, and way before I set the rules of how I wanted it manufactured.

In November of 2008, I invented a "PROTECTION SAFETY DEVICE FOR CHILDREN, THE ELDERLY, and SMALL PETS". My invention was to prevent burns to Kids, Old People, Small Pets and the certifiably clumsy from coming into contact with a still extremely hot stove top burner that could cause severe physical injury or even loss of limb and in some cases even loss of life.

To make a long story somewhat shorter I hired a company in Monroeville, Pennsylvania to arrange all of the legal steps for obtaining a patent and the original "Patent Pending" status that protects you from theft of your ideas. OK, I got the "Patent Pending", and now comes all of the efforts to make this rock-n-roll. The company I hired told me (BUT I HAVE TOO HIGH OF IDEALS TO LISTEN, AS WELL AS I DID NOT BELIEVE IT WAS TRUE), that I should not restrict the way and by whom I wanted my invention manufactured and who I would license my product to. I refused to listen, so I only have my own butt to kick and my ideals to complain about, but I have found it is very true.

My stipulations were only a two;

Whoever I licensed the product to must agree to hire the **following persons only** and in the exact order following. My invention must to be manufactured for consumption **ONLY IN THE USA and ONLY MANUFACTURED BY:**

- (a) Disabled American Veterans (Not a US VET? Don't call us -- we won't call you. IF YOU ARE A VET, the time clock is around the corner--punch in.)**
 - (b) Veterans needing employment**
 - (c) Homeless Veterans**
 - (d) Alcoholic and Drug abusive Veterans (now in recovery programs and needing work)**
 - (e) Mentally retarded or physically handicapped persons**
 - (f) Seniors seeking to supplement their meager Social Security Checks**
 - (g) Anyone else seeking employment**
- (If you are not a US Citizen you will not find a job here "GO HOME")**

Today (November 17, 2009) I received confirmations from The Shriner's Headquarters (for the Shrine's Burn Centers for children) as well as St. Jude's (Children's Hospitals), that if I could get my product into full production "THEY WOULD ENDORSE IT FOR USE NATION WIDE, as well as make it available in all of their facilities". I have already had the endorsements of the Chicago Burn Center and Los Angeles Burn Center in Sherman Oaks, California. I have done marketing surveys to show validity for a consumer market. I have endorsements from Pediatricians and Veterinarians and Geriatric Physicians as well. I have

made presentations to various Medical facilities, Fire Departments (Paramedics) and ambulance services as well as area hospitals. Everyone and every organization has cheered the product and endorsed the full need for it's use. After not having received an offer in writing for licensing or purchase of my invention property rights and patent, I decided with all of the above in mind, I would do it on my own and by myself. (I ALSO HAD PRESENTED MY IDEA AS WELL AS A PROTOTYPE FOR THE VIEWING OF SEVERAL CONGRESSMEN and WOMEN and requested their assistance because of those I intended to guarantee employment for.

Well so much for having ideals and integrity when no one else appears to. I contacted several sources who I had been directed to approach and that is when I discovered for fact "NO MATTER HOW LOUD, HARD, AND LONG YOU CLAP YOUR HANDS -- **TINKER BELL WILL NOT LIVE**". I have moved out of Never Never Land into the land of real life. I was told by one and all who I contacted, and I quote; "Unless you drop those restrictive requirements of **ONLY TO BE MANUFACTURED IN THE US BY DISABLED VETERANS and ALL THE OTHERS ON YOUR LIST, WE WILL NOT AND CAN NOT HELP YOU**". When I asked that they explain their reasoning, they simply stated and again I quote directly "**MAKING THINGS IN THE US IS TOO EXPENSIVE, and HIRING THOSE YOU DEMAND WOULD MAKE THE INSURANCE PROHIBITIVE - EVEN IF WE WOULD DECIDE TO MANUFACTURE IN THE US**". They also told me that "HIGH IDEALS ARE FINE, JUST NOT FINE FOR BUSINESS".

I was told that if I want to keep the product in the US as well as hire those I wanted to help, the only way was to OPEN MY OWN PLANT WITH MY OWN MONEY. Once I proved it a viable and profit generating operation, I would have no problem finding buyers for the company and my patent. Then they continued with, "but of course as soon as you release control "**THE VETS AND DISABLED AND INDIGENT WOULD BE FIRED AND THE OPERATION BE RELOCATED TO INDIA, TAIWAN, INDONESIA, MALAYSIA OR MEXICO WHERE THEY HAVE PEOPLE WHO WORK FOR LESS THAN \$2.00 (US) PER-DAY**". The attitude I was presented was "**NO COMPANY CAN AFFORD TO HIRE US WORKERS IN TODAY'S MARKET, THEY DEMAND TOO MUCH**". I had to agree with them on that point of US Workers Demanding to Much -- most of us want to feed our families, give them a roof over their heads and medical care. You know, those ridiculous things we really don't need. Maybe **TOO MUCH-BS?**

If you are seriously looking for something to complain about, something to change, and finally something to make right, to wit: -- KEEPING JOBS IN THE US, HIRING ONLY US CITIZENS, and FINALLY HELPING THE VETERANS OF OUR COUNTRY "**HERE IT IS**". Help me to help our country and our veterans, our homeless, and finally those who feel they are beyond finding help. I know good and well everyone of you who reads this will say "WHAT THE HELL IS WRONG HERE"? I know good and well everyone who reads this will say "SOMEONE SHOULD DO SOMETHING"! And finally, I know good and well **75% of those concerned and angry people** who have read this will lean back in their easy chair and say "I HOPE BILL CAN FIGURE OUT SOME WAY TO GET-R-DONE and help those people".

By the way you may want to look at the invention (and all of the pages on the website). Think about that little girl or little boy you know, who's fingers and hand is disfigured from touching a burner on grandma's stove she had just shut off. Think about grandma who stumbled due to her age or infirmity and laid her hand on the stove-top burner. Think about your neighbor who told you they had to put down their little kitten who jumped onto the stove top to see what they were doing. Most of all imagine they were your kids, your grandmother, your kitten or even you. THEN TELL ME HOW TO, WHO TO SEE, AND HELP ME TO "**GET-R-DONE**".

Oh by the way -- The Bureau of Veterans Affairs, told me: "**WHEN YOU GET A PLANT OPEN AND IF YOU STILL WANT TO HIRE THE VETERANS CALL US. UNFORTUNATELY WE ARE NOT IN ANY POSITION TO OFFER HELP. YOU COULD APPLY FOR A VA BUSINESS DEVELOPMENT LOAN. HOWEVER UNLESS YOU HAVE THE COLLATERAL TO JUSTIFY IT YOU WON'T GET IT. KEEP US IN MIND AND BE SURE TO CALL WHEN YOU HAVE IT GOING. WE WILL REFER VETERANS WHO NEED HELP AND NEED TO WORK**".

Visit: www.itshotkitty.com The invention is called and registered with the name "**IT'S HOT KITTY/NO BURN KIDDIE**"

**Thanks for reading
Bill**
